**WYNN'S DPF CLEANER****ADVANTAGES**

Wynn's DPF Cleaner is the first step in the regeneration service of the DPF using Wynn's MultiSERVE®. It has specially been formulated for the treatment of particulate filters that are blocked due to the presence of excessive deposits and that cannot be regenerated by normal methods.

BENEFITS

Wynn's DPF Cleaner is formulated to provide the following benefits:

- 01 Removes most deposits in DPF with serious plugging problems
- 02 Reduces the back pressure in the exhaust system
- 03 Restores correct engine operation and helps remove limp mode and fault codes
- 04 Do not affect the properties of the catalyst elements in the walls of the filters
- 05 Is biodegradable

APPLICATIONS

Wynn's DPF Cleaner is suitable for all DPF's that have severe clogging problems.

DIRECTIONS FOR USE

Wynn's DPF Cleaner is designed for exclusive use with the Wynn's MultiSERVE® machine (Product No. 68433) as directed in the equipment manual. Do not use in any other machine. Do not add to diesel fuel tank.
