**WYNN'S DPF FLUSH****ADVANTAGES**

Wynn's DPF Flush is the second step in the regeneration service of the diesel particulate filter using Wynn's MultiSERVE®. It has specially been formulated as a final rinse to neutralise alkalinity, remove dirt and soot from the filter and secures an excellent protection of the exhaust system as final stage of the cleaning.

**BENEFITS**

Wynn's DPF Flush is formulated to provide the following benefits:

- 01 Ashless formula
- 02 Metal and combustion catalyst free
- 03 Do not affect the properties of the catalyst elements in the walls of the filters
- 04 Is biodegradable

**APPLICATIONS**

Wynn's DPF Flush is suitable for all diesel engine particulate filters that have severe clogging problems.

**DIRECTIONS FOR USE**

Wynn's DPF Flush is designed for exclusive use with the Wynn's MultiSERVE® machine (Product No. 68433) as directed in the equipment manual. Do not use in any other machine. Do not add to diesel fuel tank.
