The data concerning properties and applications of the indicated products are offered in good faith and are based on our research and practical experiences. Due to the versatility of the application possibilities, it is impossible to mention all details and we do not assume any obligations or responsibilities resulting from this. When a new edition appears due to the technical development, the preceding data are no longer valid.

BENEFITS

Wynn's Air Purifier has been formulated to provide the following benefits:

- 01 Neutralises smell molecules
- 02 Does not mask the smell, but eliminates it
- 03 Removes bad smells from fabrics, e.g from furniture, seats in vehicles, carpet and curtains
- 04 Leaves a fresh delicate perfume
- 05 Does not leave stains

DIRECTIONS OF USE

1. If possible remove the source of bad odours (i.e empty ash tray, remove dirt from fabrics, carpet).
2. Place the Aircomatic® III machine (product no. 68480) in one of the following places:
 - In a car: on the floor, in front or between front and back seats, in the trunk.
 - On the floor: in trucks, buses, caravans.
3. Add the full content of Wynn's Air Purifier bottle (60ml) to the Aircomatic® III machine and operate as per the equipment manual. During the treatment all windows and doors should remain closed.

In case of the application in vehicles, ensure the engine is NOT running and the aeration system is NOT activated. Leave windows and/or doors open for a few minutes after treatment, to aerate the treated area. If the fog is pointed directly on objects, it can leave some humidity. This can be removed by simply wiping it off.

Wynn's Air Purifier leaves no stains on fabrics, metal, plastic, rubber, wood. It can leave a light stain on glass and mirrors. If this is the case, simply remove it with water or a glass cleaner. Do not nebulise directly on food, drinks, animals and humans. If nebulised on objects which can come into contact with food and drinks, rinse objects with water before use.

APPLICATIONS

Wynn's Air Purifier is applied via the Aircomatic® III machine (product no. 68480) and ideal for use in interior and trunk of cars, trucks, buses and caravans.
